FIG. 7c is a flowchart illustrating a process for clearing a voucher. The process starts at block E, which leads to a decision diamond 722: "Signature valid?". If the signature is valid (Yes), the process proceeds to decision diamond 726: "Titles in policy?". If the titles are in policy (Yes), the process proceeds to block 728: "Prepare signed voucher", then to block 730: "Send voucher to client", and finally to block 732: "Forward voucher to clearing house". If the signature is not valid (No), the process proceeds to block 724: "Log possible fraud". If the titles are not in policy (No), the process also proceeds to block 724. Block 732 leads to block F, which represents the end of the process.
